BlueCallom Night: Introducing the First Agentic AI Business Solutions, Beyond the Capabilities of Conventional Software

Autonomous AI is no longer a vision of the future – Revolutionary products empower breakthroughs once thought impossible.

Zurich, October 31, 2024 - BlueCallom, a pioneer in Agentic AI, will debut three ready-to-deploy AI solutions for businesses at BlueCallom Night on October 31, 2024, in Zurich. While current generative AI tools like ChatGPT and Microsoft Copilot offer process improvements, Agentic AI goes further, enabling autonomous actions and decision-making - always under human oversight. This breakthrough opens doors to unprecedented leaps in innovation and productivity.

BlueCallom's disruptive solutions - DISRUPT, TRANSFORM, and BANKCIRO - are ready to be immediately implemented and tailored to benefit companies of any size or industry:

BlueCallom DISRUPT provides an unmatched competitive advantage by accelerating innovation at incredible speed. This autonomous innovation system enables the creation of new concepts within hours and delivers a first prototype within weeks. With eight clusters of more than 50 interconnected AI agents, DISRUPT can operate fully autonomously or with guided human interactions.

BlueCallom TRANSFORM closes productivity gaps and boosts efficiency. Using targeted interviews with all employees, AI agents identify and understand productivity leaks, generating a detailed heatmap of issues. This allows for targeted interventions that can lead to a productivity increase of five to ten percent in just three months.

BlueCallom BANKCIRO assesses annual reports, internal banking data, objectives, and industry benchmarks to create actionable insights for leadership. Autonomous agents develop data-driven solutions based on current information, forecasts, and executive goals.

"We leverage artificial intelligence to create truly intelligent and autonomous applications that solve problems beyond the reach of conventional software," explains Axel Schulze, founder and CEO of BlueCallom. "With Agentic AI, we continue to push the boundaries of the impossible."

Before founding BlueCallom in 2022, Axel Schulze had already established groundbreaking companies, including Computer 2000, the first digital stock exchange Webstock, and Infinigate, a global leader in cybersecurity distribution.

About BlueCallom:

BlueCallom specializes in AI-driven business solutions that defy the limits of conventional software, empowering organizations to innovate at an unprecedented scale and speed. Its mission is to harness the full potential of generative AI to address complex challenges and unlock groundbreaking opportunities.

With its Autonomous Innovation System, BlueCallom not only reimagines the innovation process but also sets a new standard for what's possible in the age of AI.

BlueCallom received the German Innovation Award in 2024 for its innovation framework and GPTBlue software. The company was founded in 2022 by Axel Schultze and is headquartered in Zurich. Further information can be found at <https://bluecallom.com/>.
