

BlueCallom SALESTICE

— Enterprise Workflow Intelligence
in Sales without CRM

Re-Imagine Enterprise Sales Beyond CRM and Manual Processes

- BlueCallom SALESTICE transforms enterprise sales by reversing the traditional time ratio that holds teams back. Salespeople today spend 60–80% of their time on administrative tasks instead of engaging customers — a burden that slows performance and limits growth.

Powered by 10 mostly autonomous Agents, SALESTICE researches leads, prepares outreach, schedules meetings, updates forecasts, and generates reports — often before your team even starts their day. It eliminates the need for conventional CRM processes and removes the administrative clutter that consumes valuable selling time.

By shifting the focus back to customer engagement, SALESTICE enables sales teams to operate with greater clarity, higher efficiency, and far more impact — turning every day into a performance advantage.

- **OPERATIONAL EXCELLENCE**
Continuously strengthen your position across all business areas.

- **TIME TO CLOSURE**
Delays vanish unless caused by customer. SALESTICE removes the rest.

- **TEAM INVOLVEMENT**
Act strategically before anyone knows what's happening.

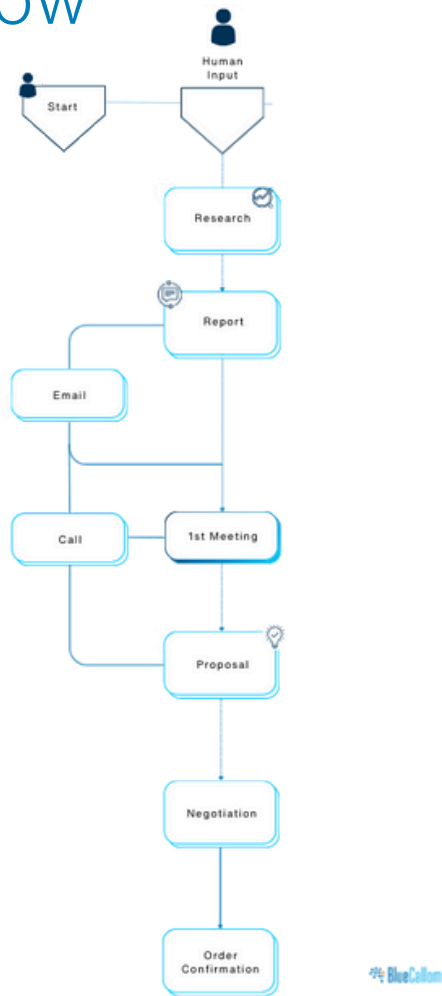

Ready to SALESTICE?

- Take the first step with **BlueCallom SALESTICE** to shift sales into full customer engagement.
